Board of Welfare

Sendlist: About informationmaterial from Narconon
Minister of welfare National Board of Health and Welfare
Lst Stockholm Nils Bejerot Karolinska Institutet
This office intends to instruct the board of welfare a report on supervision from the Narconon facility at Vårby Farm in december. During this process this office discovered som material that we want to disclose prior to the supervision report.
Falsification regarding statement from Nils Bejerot
During the month of May a number of documents from Narconons facility on Fålasjö was recieved. Receptians was named "Politicians , drugrehabilitaters, Socialworkers" (app 1)
On document was designed like a statement and was signed by Nils Bejerot March 21 1988. The letterhead was stating Karolinska Institute , faculty of social medicine.

It was later discovered that the content of this document in detail and as a whole , could be found in a letter written by Nils Bejerot 8 years earlier July 28 1980 (app 2) Tne only differense between the two documents were that some parts from the earlier document were left out in the latter. The office of welfare asked Nils Bejerot in a letter 1988-09-27 if he was the author of the document dated March 21 1988.

Through his co-worker Anna-Stina Eklund, he stated 1988-10-10 , that he had not visited Narconon Huddinge March 21 1988 and had not wrote or signed the document from the same date. Through Anna-Stina Eklund he also stated that he had no intention of reporting the matter to the police.

Statements regarding a Spanish investigation

From the Narconon material februari 1988 , adressed to "The Minister of Welfare, politicians, drugrehabilitaters,socialworkers" a "professional investigation....made in Spain" and a draft material from TAIM is included (app 3)

In Narconon news (unnumbered issue before nr 2 1988) it states on the fronpage "Official investigation of Narconon in Spain – 78% rehabilitated" and inside the paper it is stated that the investigation was conducted by initiative of the spanish government (app 4)

This office wrote the spanish authorities for information in this matter (app 5)

The delegation of the national plan against drugs from the Spanish government has through its member , Pilar Alvarez answered the office (app 6)

The office made a quick translation of this material (app 7)

The Spanish delegation states that neither the government nor any other public authority has in any way supported Narconon. No investigation has been ordered , commented or requested by the government or any other public authority. Nor has either authority expressed any confidence of the results from his investigation, due to the fact that selection and interwievs has been conducted by Narconon itself and results are deemed totally unreliable.
